

# THE FLIPPED CLASSROOM

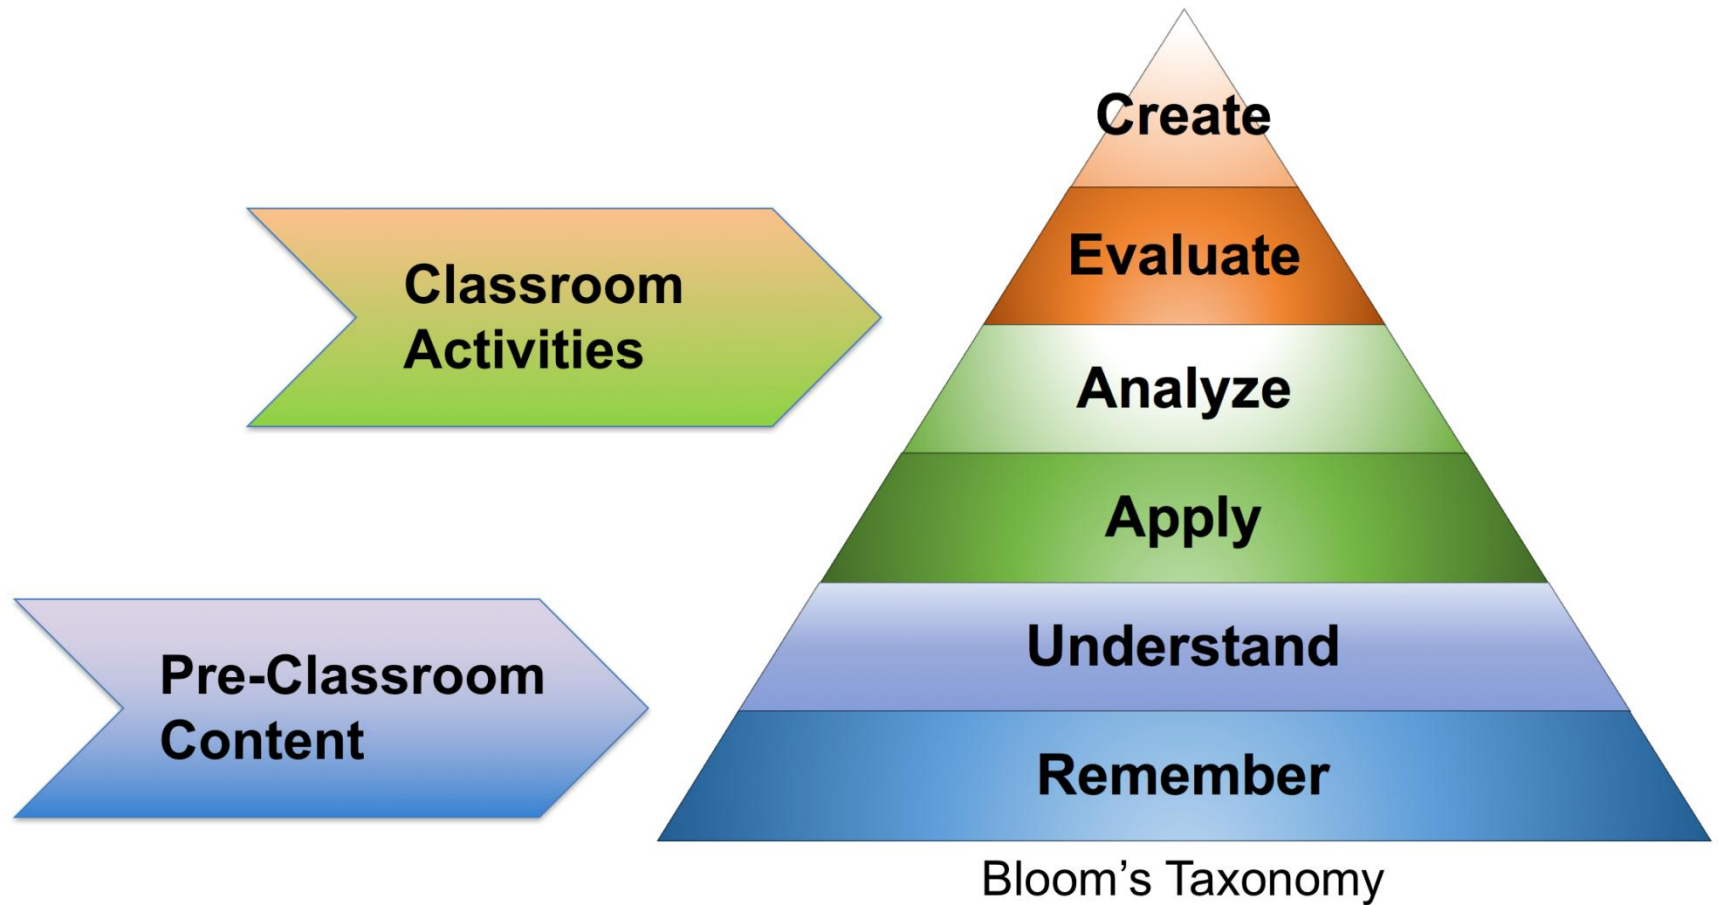

**“The flipped classroom** describes a reversal of traditional teaching : students gain first exposure to new material **outside of class** (usually via reading or videos) **and then class time is used to do** the harder work of assimilating that knowledge through several strategies [**active learning**]...

In terms of **Bloom's revised taxonomy (2001)**, this means that students are doing **the lower levels** of cognitive work **outside of class**, and focusing **on the higher forms** of cognitive work **in class**, where they have the support of their peers and their teacher.

In the traditional model “first exposure” occurs in class, with students assimilating knowledge through homework; thus the term “flipped classroom.”
